

Iran RenExpo & Conference 2010

Iran RenExpo & Conference 2010

Iran's quest for clean energy and sustainable development rests a great deal on our ability to tap energy from renewable sources, and to use it extensively to meet our growing and diverse needs. The threat of global warming and climate change due to excessive use of fossil fuels increases the urgency of finding environmentally sound ways of generating energy. Moreover, faster economic growth and increasing the demand for energy, makes us to find new sources of energy, therefore we need to harness renewable sources of energy.

Iran is blessed with an abundance of non-depleting and environment friendly renewable energy resources such as solar, wind, biomass, hydro and geothermal.

The Iranian scientific and industrial communities are mandated to accord the highest priority to exploring and utilizing the tremendous potential of renewable and clean resources of energy. Iran is implementing a large program for the deployment of renewable energy products and systems, and a new regulation on buying energy with preferable fees from private sector has been enacted.

Iran RenExpo and Conference 2010 is a forum for global technologies to present their ability to public and private sector on renewable energy. It is a platform to provide value for the domestic industry and showcase opportunities in Iranian market for global players. It is a forum to nurture business contacts, imbibe the latest technology trends, cultivate business relations and prepare for the growth of renewable energy in Iran.

To this end, Iran Chamber of Commerce, mines and industry plans to hold **Iran Renewable Energy Expo and Conference** in coordination with the Iran Renewable Energy Organization (SUNA) on 2-5 March 2010 in Tehran Permanent Fairground.

Featuring:

Bio Hydro Solar Wind Cogeneration Geothermal
Energy Efficiency

Profile:

Supported by	Iran Chamber of Commerce, Industries and Mines
Organized by	Hessam Company
Title of the Exhibition	Iran RenExpo & Conference 2010
Venue	Tehran Permanent International Fairground
Date	2-5 March 2010
Registration Deadline	21 January 2010
